

Jade BARBIER

LOOKING FOR A 12 WEEKS INTERSHIP IN EMBEDDED SYSTEMS AND NETWORK ENGINEERING

I'm Jade Barbier, an engineering school student with a passion for computer science. I am looking for a 12 weeks internship in embedded systems engineering. I want to make the most of the skills I acquired during my studies at the National Engineering School of Le Mans (ENSIM) and the valuable experience I gained as an apprentice at the Rolling Stock Engineering Centre (CIM) of SNCF. I want to contribute positively to your company's projects while consolidating and expanding my knowledge.

Languages

French

> Maternal language

English

> TOEIC: 940/990

Spanish

> B2 level

Hobbies

Programming (embedded systems and software)

Reading (English, French)

Computer science

Python, C, C++, HTML, CSS, JS (NodeJS, Angular), Java, Arduino, Assembler, TypeScript, LabView, Windows CVI, MATLAB/Simulink

Git, GitHub, GitLab

PIX Certification

Assets

Adaptability

Versatility

Autonomy

Perseverance

Collaboration

Experience

Work-study program in embedded computing and networks

CIM - SNCF Voyageurs, Le Mans

From September 2024 to September 2027

- ◆ I test the compliance of equipment with ITxPT specifications according to their power consumption and their compatibility with the produced or consumed services.
- ◆ I am developing a client software using EST APIs for a PoC on securing on-board communication.

ENSIM, Le Mans

- ◆ I develop applications in JavaScript, TypeScript, Java, Python and C on Linux and Windows, sometimes using Raspberry Pi, Arduino and STM32 Discovery boards.
- ◆ I have collaborated on mechatronic projects, including an automated card display system and a connected Pictionary game.
- ◆ I have worked on personal projects, including games and several embedded systems via Arduino, such as various autonomous vehicles, a handheld game console and many others, often associated with 3D modeling.

Packaging Operator

Colart International, Le Mans

From June 2023 to August 2023

- ◆ I assembled, controlled and packaged different semi-finished products (materials and artistic tools) on a production line following the associated procedures.
- ◆ I have maintained a smooth production while respecting safety standards and deadlines.

Skills

Control

Apply and comply with safety rules, ensure that products comply with established standards or specifications.

Organizational skills

Manage my time and prioritize tasks, work methodically to meet production deadlines while maintaining the quality of the work. Organize and version my code.

Network Application Design

Design and implement client-server games and networked applications, managing reliable communication and data flow between clients and servers.

Cross-platform embedded development

Develop multi-platform software (Linux, Windows, Docker) and for different embedded systems.

Education

Master 1 level

From September 2022 to September 2027

Ecole Nationale Supérieure d'Ingénieurs du Mans (ENSIM), Le Mans

4th year of studies: Work-study student in computer engineering.

General Baccalaureate

2022

André Malraux High School, Allonnes

Physics-Chemistry, Mathematics with honors.
